

## **Anaheim Union High School District**

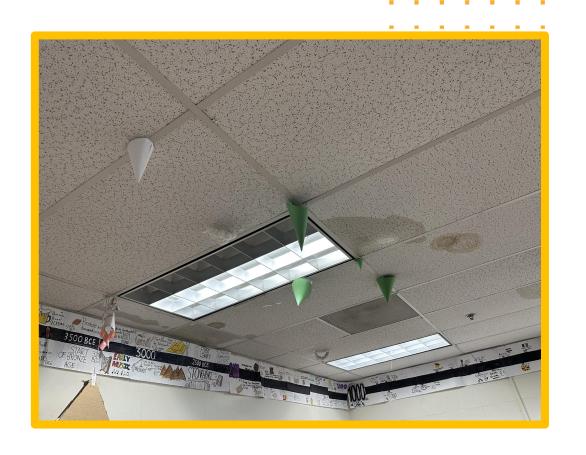

We are recognized as one of the most innovative in the nation, partnering with UC-Irvine and more than 90 companies including Google. We're proud to have a graduation rate of 91%

## Outdated Classrooms

While our students and teachers excel, most of our schools were built more than 60 years ago when asbestos and lead pipes were used.

We currently have 79 portable classrooms that are more than 20 years old, with water leaks and structural damage that are expensive to maintain and repair

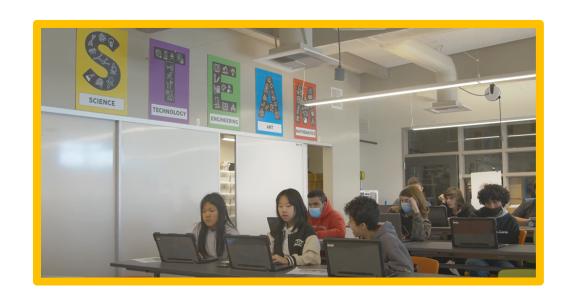

## Potential Bond Measure

Funding from a potential bond measure could:

- •Removing hazardous materials like asbestos and lead pipes from our older schools
- •Upgrading schools in need so they meet current health codes, building safety codes, and provide proper access for students with disabilities
- •Making repairs to older classrooms and school facilities including deteriorating roofs, plumbing, gas lines, sewer, heating, ventilation, and electrical systems
- •Providing modern classrooms, science labs, career technical facilities, and equipment so students receive a high-quality education and are prepared for college, in-demand careers, and skilled trades
- •Improve student safety and school security with fencing, cameras, emergency communication systems, and fire safety

## **Fiscal Accountability**

A bond measure would include strict fiscal accountability protections:

- By law, all funds remain under local control and may only support local middle and high schools
- Mandatory independent citizen oversight and public reports of all spending
- Funded by a levy limited to 3 cents per \$100 of assessed property value (assessed value is generally much lower than market value if you've owned your home a long time)
- No funds may be taken by the State
